

Solution Requirements (Functional & Non-Functional)

Requirement Analysis

Author: KADALI GEETHA SRAVYA | Team ID: PNT2025TMID_COSMETICS_01

1. Functional Requirements

- FR-01: Load and clean dataset of 1,472 cosmetic products across 10 fields.
- FR-02: Create calculated field 'ALL SKIN TYPES COUNT' summing binary skin flags.
- FR-03: Implement category distribution tree-map and brand pricing scatter plot.
- FR-04: Embed Tableau story and dashboard into Flask web UI with dynamic filter parameters.

2. Non-Functional Requirements

- NFR-01 Performance: Dashboard & web pages must load in < 2 seconds.
- NFR-02 Usability: Responsive layout with glassmorphism visual aesthetics.
- NFR-03 Reliability: 99.9% uptime for local web server and accurate metric calculations.
