

Technology Stack & Technical Architecture

Requirement Analysis

Author: **KADALI GEETHA SRAVYA** | Team ID: **PNT2025TMID_COSMETICS_01**

1. Technology Stack Selection

- Backend Framework: Python 3.x with Flask.
- Data Processing: Pandas, NumPy, CSV utilities.
- Data Visualization: Tableau Desktop / Tableau Public.
- Frontend Web Interface: HTML5, Vanilla CSS3, JavaScript (Fetch API).
- Version Control: Git & GitHub.

2. Architectural Overview

The system uses a decoupled architecture where data preprocessing generates clean CSV files, Tableau handles visual analytics, and Flask serves the interactive web application.
