1. Project Title & Student Information

Project Title: Cosmetic Insights: Navigating Cosmetics Trends and Consumer Behavior with Tableau

Author / Student Lead: KADALI GEETHA SRAVYA

Team ID: PNT2025TMID_COSMETICS_01

Submission Date: February 2025

2. Abstract & Executive Summary

This comprehensive final report presents the end-to-end development of the Cosmetic Insights analytical system. By evaluating 1,472 cosmetic items across key attributes (Brand, Label, Price, Rank, Ingredients, Skin Types), the project reveals crucial market patterns, pricing strategies, and product suitability.

3. Key Findings & Insights

- **Category Leadership:** Moisturizers and Cleansers represent the largest product share.
- **Skin-Type Coverage:** Approximately 34% of products cater to all 5 skin types simultaneously.
- **Price vs Rating Correlation:** High price does not strictly guarantee higher consumer ranks, highlighting strong budget-friendly performers.

4. Web Integration & Deployment

The interactive Flask web application bridges dataset exploration with Tableau stories, providing an intuitive dashboard interface.

5. Conclusion

Project successfully completed by KADALI GEETHA SRAVYA meeting all functional and documentation requirements.
